| **Advanced Fashion Designer (2 weeks)** | Design it-make it-wear it!  
This 2-week course is developed for the experienced fashion sewer. *Students from my previous classes qualify.*  
Our first week is short due to the holiday. This 3-day week is devoted to learning flat pattern to design your own sundress.  
Learn flat pattern to design your sundress  
In our second week:  
You will make your sundress from your own design OR if you missed the first week you can sew one from a commercial pattern.  
Learn advanced sewing techniques  
Learn to add zippers  
**Important note: You will have to register for both camps separately. It works as a two-week camp, but it is divided to work separately.** |
| Colleen Moretz  
Elementary, Middle and High School  
Weeks 3 and 4 |
| **Commercial Dance Camp** | Have you ever watched the dancers surrounding your favorite musical stars and wanted the chance to dance in that style? Or have you watched your favorite television dance shows and dreamed of being on the stage dancing for your life? Have you ever seen commercials featuring dance and wondered how it’s all put together during filming? This camp will give you the experience and knowledge you need to dance like the professionals performing all the latest dance styles straight from LA, where the magic is made! You will get to learn how to alter your performance in order to get the best possible outcome in the different mediums of live performance, film, and television all while dancing your heart out to some of today’s newest music and biggest hits. The final product of this camp will be a filmed commercial which all participants will help to create. This camp will be a fun and energetic way to perfect your jazz, hip hop, and contemporary dance styles while giving you the information you need to succeed in one of the industry’s toughest cities – Los Angeles! |
| Shayna Petruccelli  
Middle and High School  
Week 4 |
| **Advanced Strings Camp** | Class schedule and notes: This camp requires that the student have a minimum of 2 to 3 years of experience.  
This camp will let students with string instrument experience play and have fun in a summertime orchestra. This camp gives students who take private lessons and/or are involved in their school’s orchestra a chance to improve their musical skills during the summer. Students will receive both individual and group instruction in preparation for a concert performed at the end of the camp. Students in this camp should be able to comfortably read music and basic rhythms on all four strings of their instrument (violin, viola, cello, and bass). Cab Summer also offers a beginners string camp where experience is not necessary. |
| Daniel Melbourne  
Elementary, Middle and High School  
Week 4 |
| **Digital Flip Books**  
Carlos Alejandro  
Middle and High School  
Week 4 | Interested in how to make a short animated film using any digital camera, still or video? Like flip books? Using legos, clay, actual people, cut up pieces of paper, a pen, a paint brush... anything you can think of... we will make very short animated sequences in iMovie and Final Cut Express/Pro using green screen, montage, etc.  
Most digital cameras will be fine. The easier, the better... |
|---|---|
| **Pinwheels**  
Lindsey Ostafy  
Elementary  
Week 4 | We will be exploring peace through the creation of pinwheels. The international art installation called “Pinwheels for Peace” will be a main theme for our art making. We will create a variety of 2-D and 3-D artworks with the theme of peace. Spread the word- Peace will be spinning through this camp! |
| **Building and Breaking - An introduction to Architecture (8th - 12)**  
Bruce Decker  
High School  
Weeks 4 and 5 | Interested in Architecture? Curious about the buildings you live and work in? Interested in maybe considering it as a college major? Building and Breaking is a two week summer program that will give you a glimpse of what it’s like to study architecture. It will also let you get your hands dirty in the thoughts and processes that generate the buildings that surround, shelter, and protect us. This program is designed for students who are potentially considering Architecture as a course of future study. But ! ... if you're maybe only curious - it's also designed to be a lot of fun. You will learn the basic language of the architectural discipline. Get a glimpse of the rich history of architecture and civilization. You’ll also get to see some of the astounding developments happening in the world today. We will also explore & experiment with some of the basic engineering ideas that keep the floors securely under our feet, and the roofs safely over our heads.  
During your two weeks, you will be guided through a simple design process that will result in your own building design. You will gain a basic understanding of how architectural drawings function to create buildings. You will also get to build, test, and demolish a series of simple balsa wood structures. This exercise will offer the opportunities to 1.) Have fun breaking things, and 2.) Provide an enriched understanding of how structures and basic engineering principles perform when they are overloaded to the point of failure. |
