

Program for the BNPSki satellite workshop : 9th january 2014.

9:30 – 10:10 am : Francois Caron (INRIA, France)

Title : *Bayesian nonparametric Plackett–Luce models for modelling ranking data.*

10:10 – 10:50 am : Merlise Clyde (Duke Univ, USA)

Title : *Computational Strategies in Lévy Adaptive Regression Kernels*

Coffee Break [10:50 – 11:20]

11 : 20 – 12 am : Peter Mueller (Univ of Texas, Austin, USA)

Title : *A Nonparametric Bayesian Approach to Subgroup Analysis*

12 :00 – 12 :40 am : Sonia Petrone (Bocconi Univ, Italy)

Title: *Improving multivariate Dirichlet mixture models via enrichment*

Lunch [12 :40 – 2pm]

2pm – 2 :40 am : Igor Pruenster (Univ of Torino, Italy)

Title : *Clustering and borrowing of information for a class of dependent priors.*

2 :40 – 3 :20 pm : Emily Fox (Washington univ,Seattle, USA)

Title : *Determinantal Point Processes on Continuous or Large, Countable Spaces*

Coffee break

4 – 4 :40 pm : Ed George (Wharton School, Philadelphie, USA)

Title : *Monotone BART*
